

SUMMARY

Motivated and ambitious M.Sc Computer Science graduate seeking a programming role to apply my creativity, analytical thinking, and fast learning with your company.

EDUCATION

2023-2025 Bar-Ilan University | M.Sc Computer Science (Data Sciences and Artificial Intelligence)

- current GPA 94.2
- Relevant Courses: Deep Learning, Machine Learning, AI, Robotics

2021-2023 The Academic College of Tel-Aviv Yafo | B.Sc Computer Science

- Selected to Dean's List for academic achievement
- Relevant Courses: Computer Vision, Algorithms, C++
- Final GPA 88.2
- Participated in the 2023 IDC hackathon at Reichman University in collaboration with Salesforce, Nice, and Renuar. Developed a website for STT customer service.

2015-2017 'Yitzhak Ben-Zvi' High School

- Graduated from the scientific major

MILITARY SERVICE (IDF)

2017– 2020 Combat soldier in a classified unit of the Israeli Navy

- Command and Control Combatant role, I was also Head of Radio & Navigation Department
- Maintained professionalism, decision-making abilities, leadership, teamwork, and ability to handle complex tasks in both routine and high-pressure situations
- Full service: Discharged as Staff Sergeant

Projects

Prediction Simulation Platform | Java | [GitHub](#)

- Developed a meta-simulation system for forecasting societal impacts, optimizing backend logic for scalability.

HTTP Web Server | C++ | [GitHub](#)

- Built a lightweight server handling concurrent requests, demonstrating OOP and system design skills.

DeepRNABinding | Python, Pytorch | [GitHub](#)

- Contributed to a deep learning model for predicting RNA-protein binding intensities.

Languages | Hebrew (native), English (High level)
